

Acne Report

Problem Detected: Acne

Clogged pores, excess oil, and bacteria are causing pimples and breakouts.

Solution

Chemical Peel

Helps remove dead skin, clear clogged pores, and reduce active acne.
It also helps improve skin texture and lighten post-acne marks over time.

Laser Therapy

Helps target active acne, reduce inflammation, and calm the skin.
It supports clearer skin and helps control recurring breakouts more effectively.

Medicated Treatment

Helps control excess oil, bacteria, and acne-causing irritation.
It supports long-term acne management and helps prevent new breakouts.

📌 **Combination treatment may be recommended.**

Stage & What You Should Do

Early Stage

What to do:

Basic skincare + oil control routine.

Why this helps:

Helps control acne early and prevent breakouts.

Moderate Stage

What to do:

Chemical peel / clinical treatments.

Why this helps:

Helps reduce acne, marks, and inflammation.

Advanced Stage

What to do:

Laser + advanced acne treatments.

Why this helps:

Helps control severe acne and prevent scarring.
