

Tanning Report

Problem Detected: Tanning

Skin darkening due to sun exposure and UV damage.

Solution

Detan Treatment

Helps remove surface tan and refresh sun-exposed skin.
It improves skin brightness and restores a cleaner, fresher look.

Chemical Peel

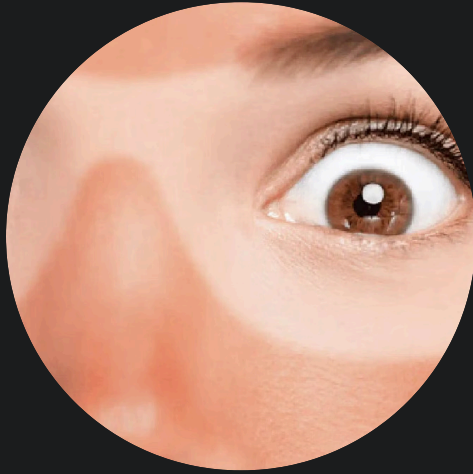

Helps reduce deeper tanning by removing damaged outer skin layers.
It supports a more even tone and brighter skin appearance.

Laser Therapy

Helps target stubborn tanning that does not improve easily.
It supports clearer skin and helps improve overall skin tone.

❏ **Combination treatment may be recommended.**

Stage & What You Should Do

Early Stage

What to do:

Sunscreen + basic detan care.

Why this helps:

Prevents further tanning.

Moderate Stage

What to do:

Chemical peel.

Why this helps:

Reduces visible tanning.

Advanced Stage

What to do:

Laser treatment.

Why this helps:

Removes deep tanning effectively.
